SUMMARY

Full Stack and Mobile Developer with nearly 5 years of experience building and shipping web and mobile products with Flutter, React.js, Next.js, Vue.js, TypeScript, Node.js, and Ruby on Rails. Delivered 10+ production apps, including a logistics platform handling ~2,000 orders per day for 400+ drivers, co-founded a restroom-finder app published on the App Store and Google Play, and lead Linkora, a retail SaaS platform, as CEO. Hands-on across Figma-to-code UI, REST APIs, databases, cloud infrastructure on AWS and Google Cloud, and sprint planning for a 4-person team.

SKILLS

Languages: TypeScript, JavaScript, Dart, PHP, Ruby, SQL, HTML, CSS/SCSS
Frontend: React.js, Next.js, Vue.js, Angular, Tailwind CSS, TanStack Query, Zustand, WordPress
Mobile: Flutter, Ionic, Capacitor, Cordova, iOS, Android, App Store and Google Play publishing
Backend: Node.js, Express, Ruby on Rails, Laravel, REST APIs
Databases: PostgreSQL, MySQL, Supabase, Firebase, MongoDB
Cloud & DevOps: AWS, Google Cloud, Docker, nginx, Linux, Cloudflare
Tools & Methods: Git/GitHub, Playwright, PostHog, Jira, Trello, Figma, Agile/Scrum, Claude Code (AI-assisted development)

EXPERIENCE

Full Stack & Mobile Developer
HT DEVS | Jun 2024 – Present

- Shipped 9 cross-platform mobile and web applications serving ~1,000 users combined, using Ionic, Capacitor, React.js, Next.js, and Vue.js.
- Built and integrated backend services, databases, and cloud infrastructure with Ruby on Rails, TypeScript, Supabase, PHP, MySQL, and Google Cloud.
- Ran task allocation, backlog grooming, and sprint planning for a 4-person team delivering 9 apps, and guided other developers on API structure.

Full Stack & Mobile Developer
Florida Sand & Gravel LLC | Freelance | Jul 2025 – May 2026

- Built and published a Flutter app for iOS and Android that 400+ drivers used to receive, track, and complete ~2,000 orders per day.
- Developed the web administration dashboard with Next.js, TypeScript, Node.js, and Express to create and manage orders.
- Owned the integration between the driver app, dashboard, and backend, from API design to production deployment.

Full Stack Developer & DevOps
WAOK | Aug 2025 – Feb 2026

- Built a Flutter mobile app, deployed at a hospital, that lets staff submit service requests and monitor operations in real time.
- Developed an administrative dashboard with Next.js, TypeScript, and PHP/Laravel to manage requests and internal workflows.
- Managed cloud infrastructure and deployments on AWS, Google Cloud, Docker, Linux, and Cloudflare for the hospital platform.

Frontend Developer (Web & Mobile)
Grupo Neuron | Dec 2021 – Oct 2023 (full-time), freelance through May 2025

- Contributed to Web Factory, the company's in-house CMS, used to speed up delivery of client web products.
- Led frontend development of web and mobile features with Angular and React.js within a 7-person team.

- Built mobile apps with Ionic, Capacitor, and Cordova, and backend features with TypeScript and Node.js.

Frontend Developer
Ai Dev Pro | Part-time | Aug 2023 – Jun 2024

- Built layouts for custom WordPress themes using HTML, CSS, and JavaScript.

Mobile Developer
Riidelt | Dec 2023 – Feb 2024

- Developed features for a ride-hailing (passenger transport) app on iOS and Android using Angular, Ionic, Capacitor, Cordova, and TypeScript.
- Translated Figma designs into iOS and Android interfaces and built new modules for the app's ~30 users.
- Handled admin-side development alongside mobile work and organized development sprints.

Full Stack Developer
Dick Clark Real Estate | Freelance | Apr 2023 – May 2023

- Delivered a full-stack web application from concept to production, owning backend development and architecture.
- Built the solution with TypeScript, Angular, Node.js, and MySQL.
- Managed client communication, requirements gathering, and the delivery timeline.

PROJECTS

Linkora – Retail SaaS Platform
CEO | Jun 2026 – Present | linkorasoftware.com

- Lead Linkora, a multi-tenant SaaS that gives retail stores a branded online storefront on their own subdomain, an admin panel, and electronic shelf labels, all synced from one product catalog.
- Co-develop the platform with Next.js, React, TypeScript, and Tailwind CSS, building the electronic shelf label module, role-based access control, multi-currency pricing with automatic daily exchange rates, and a self-checkout flow.
- Added product analytics with PostHog (store traffic and error tracking) and handle deployments on a VPS with Docker, nginx, and Cloudflare.

Resty – Restroom Finder App
Co-founder & Lead Developer | May 2026 – Present | app-resty.com

- Co-founded Resty, a community app that helps people find clean restrooms nearby, and published it on the App Store and Google Play.
- Developed the Flutter mobile app, a Next.js website, and a Node.js/Express REST API backed by PostgreSQL.
- Reached 120 downloads and 110 users since launch, taking the product from design to store release.

EDUCATION

B.S. Software Engineering (in progress) – Universidad Nacional Experimental del Táchira (UNET) | 2022 – 2028 (expected)

CERTIFICATIONS

Node.js – 98th percentile – TestGorilla
